ICICLE RESTORATION TREES DIRECT**

Icicle Restoration Trees Direct
Sale #12701

09/28/2011

Timber Sale Report:

Icicle Restoration Trees Direct is the result of the relocation of the Icicle Road from spring flooding in 2008. The road was relocated out of the riparian area adjacent to Icicle Creek. In the environmental assessment it was stated that "Trees within the footprint of the roadbed that meet criteria for aquatic restoration would be removed with root wads attached and made available for those projects" (page 19 of Icicle Road Relocation Project Environmental Assessment). The Yakama Indian Nation has expressed interest in buying this material for restoration projects. The Forest sold a similar type of sale to WSDOT (I-90 Phase 1C Restoration Trees Direct at Cle Elum RD on 05/09/2011) for \$3.00 per CCF (minimum rate for sawlog material). **The Forest also felt that to be consistent with selling this type of material for restoration projects that this offer also at the same minimum rate of \$3.00 per ccf.** Volume for the logs was determined by scaling the logs using Scribner Decimal C method (Eastside 20 foot maximum length) and converting the board foot volume to ccf by multiplying board foot volume 13.580 MBF x 1.923 conversion factor = 26.114 rounded to 26.0 ccf.

Total volume of 26.0 ccf X \$3.00 = \$78.00

This sale will be sold on a 2400-4 and it will be a Direct sale to the Yakama Indian Nation.
